

## Model 7005

### Use

The emergency cash desk counter is designed for installation in prepared door leaves that are 53 mm, 60 mm or 70 mm thick. It helps banks continue checkout operation during emergencies, such as power outages or malfunctioning ATMs.

### Safety and features

- Counter element for emergency cash desk doors that are 53 mm, 60 mm or 70 mm thick.
- Fold-away flat tray for passing flat objects (such as identification papers, receipts, cards) up to 30 mm high.
- Installs quickly and easily into a door leaf section prepared by the customer. The operator then tightens the frame section to fit snugly.
- Uses stud bolts to lock when pushed in or folded up. Adjustments can only be made by the operator behind the counter by pulling the fixing stud.
- Changes position within seconds, so the pass-through can be put to immediate use.
- The tray offers firearms protection and is capable of withstanding heavy handgun fire. The tray has also received FB4 certification from the firearms licensing authority.

### Materials and use

- Safety glass adhering to C3 SF or BR4N S.
- Frame made of 2 mm and 3 mm brushed stainless steel. Tray made of stainless steel and steel with black-brown powder coated cover.
- All metal parts have been produced using state-of-the-art precision laser cutting technology for ultimate quality.
- Model 7005 is suited for use indoor emergency cash desk doors.
- The unit requires no maintenance. No need for cleaning or lubrication.
- No power required for operation.
